## General Production Program

**Connectors**

- Unipole from 2 to 150 Amps
- Coaxial 50  $\Omega$  and 75  $\Omega$
- Coaxial 50  $\Omega$  (NIM-CAMAC)
- Coaxial 50  $\Omega$  for frequency  $\rightarrow$  12 GHz
- Multicoaxial 50 and 75  $\Omega$
- Multipole from 2 to 66 contacts
- Multipole up to 106 contacts
- High Voltage 3, 5, 8, 10, 15, 30 and 50 kV cc
- Multi High Voltage 3, 5, and 10 kV cc
- Triaxial 50 and 75  $\Omega$
- Quadrax
- Mixed: High Voltage (HV) + Low Voltage (LV)
- Mixed: Coax + LV
- Mixed: Triax + LV
- Thermocouple
- Multithermocouple
- Fiber optic singlemode
- Fiber optic multimode
- Mixed: fiber optic + LV
- Mixed: fiber optic + coax + LV
- Fluidic
- Multifluidic
- Mixed: fluidic + LV
- Subminiature
- Miniature
- Plastic
- Printed circuit board
- Remote handling
- Watertight
- Sealed (pressure and/or vacuum)
- With plastic outer shell
- With aluminum outer shell
- With stainless steel outer shell
- With special radiation resistant insulator material
- With screw thread coupling for very high pressure
- With microswitch

**Patch Panels**

- For audio-mono applications: triax
- For audio-mono applications: 3 contacts
- For audio-stereo applications: quadrax
- For audio-stereo applications: 6 contacts
- For video applications: coax 75  $\Omega$
- For video HDTV applications: 3 coax 75  $\Omega$  + 2LV

**Patch Panels** For fiber optic applications

**Adapters** For BNC, C, UHF, N, CINCH, GEN-RADIO connectors  
For TNC, SMA connectors

**Accessories**

- Insulator for crimp contacts
- Crimp contacts
- Coaxial contacts
- Triaxial contacts
- Fiber optic contacts
- Fiber optic ferrules
- Caps
- Bend relief
- Heatshrink boot
- Insulating washers
- Double plastic panel washers
- Locking washers
- Tapered washers
- Hexagonal nuts
- Conical nuts
- Round nuts
- Notched nuts
- Earthing washers
- Lead-through with cable collet

**Tooling**

- Wrenches
- Assembly tool
- Pliers
- Taps
- Crimping tools
- Positioners
- Crimping dies
- Extractors
- Banding tool
- Retention testing tool for crimp contacts
- Fiber optic termination workstation
- Fiber optic polishing tools

**On request**

- Filtered connectors
- Connectors with special housing
- Mixed special configuration
- Assembly onto cable

● Connectors, accessories and tools found in this catalog.

## Main Characteristics and Types

							
Series	STANDARD	WATERTIGHT	KEYED	KEYED WATERTIGHT	HARSH ENVIRONMENTS	RECTANGULAR	SCREW

## LEMO's Push-Pull Self-Latching Connection System

This self-latching system is renowned worldwide for its easy and quick mating and unmating features. It provides absolute security against vibration, shock or pull on the cable, and facilitates operation in a very limited space.

The plug and the receptacle can be mated by simply pushing axially the outer shell of the plug.

Pulling on the cable or any other component of the plug than the outer release sleeve cannot break the connection.

The connector can be unmated by a single axial pull on the plug outer release sleeve.

## R Series Production Program

Series		RR	OR	1R
Cable $\phi$ range (mm)	min.	1.0	1.5	2.0
	max.	4.0	6.2	9.2
Number of contacts (multipole)		13	10, 17, 37	28, 36, 67
Number of contacts (mixed HV+LV)		-	4 HV + 4 LV, 2 HV + 13 LV	8 HV + 3 LV
Number of contacts (mixed coax+LV)		1 coax + 4 LV	4 coax + 4 LV, 2 coax + 13 LV	8 coax + 3 LV
Number of contacts (mixed fluidic+LV)		-	4 fluidic + 4 LV, 2 fluidic + 13 LV	8 fluidic + 3 LV

**Note:** «LV» stands for low voltage.

**R SERIES**

# R Series

The R series is a rectangular connector with high pin density in a flat profile. It uses LEMO's well proven Push-Pull latching system for a smooth, hassle free connection. The ergonomic and flat profile offers high panel density, in a wide choice of colors for excellent visual aesthetics.

The R series is made of lightweight polyester resin Crastin® PBT from Dupont™. The high flexibility of its design enables various contact configuration, such as multipole, coaxial, high voltage and fluidic.

R series connectors provide the following main features:

- plastic shell for lightweight yet rugged structure
- push-pull latching enable fast and secure connections
- crimp or printed circuit contacts
- choice of 4 colors for aesthetics and quick identification
- high pin density for improved panel space
- 3 sizes and various models for design choices
- standard or hybrid pin configurations for flexibility
- thin footprint for reduced rack space and high density panel.

The R series, is initially designed to interconnect systems in medical application where aesthetics and safety is required. This connector series can also be used for test & measurement, aerospace and automotive testing, where an extensive number of contacts are needed in a limited space.

Plastic material used for manufacturing insulators is selected according to the required electric and thermal properties. The thermoplastic used is PEEK (Polyether-Etherketone) with the addition of glass fibers to improve mechanical characteristics and to increase dielectric strength.

## Plastic housing models

## Part Numbering System

## Part Number Example

### Straight plug with cable collet:

**FGG.1R.336.GLC92** = straight plug with key (G) and cable collet, 1R series, multipole type with 36 contacts, outer shell in gray PBT, PEEK insulator, male crimp contacts, collet for 9.2 mm maximum diameter cable.

### Free receptacle:

**PHG.1R.336.GLM92** = free receptacle with key (G) and cable collet, 1R series, multipole type with 36 contacts, outer shell in gray PBT, PEEK insulator, female crimp contacts, collet for 9.2 mm maximum diameter cable.

### Fixed receptacle:

**EGG.1R.336.GLM** = fixed receptacle, nut fixing, with key (G), 1R series, multipole type with 36 contacts, outer shell in gray PBT, PEEK insulator, female crimp contacts.

## Part Section Showing Internal Components

## Housing models

### FGG Straight plug, key (G) or key (A), with cable collet

Reference		Dimensions (mm)			
Model	Series	A	B	L	M

# Crimp Contacts

## Contacts for plugs, free or fixed receptacles

Ref.	Contact type	Ref.	Contact type
C	Male crimp (fig. 1) <sup>1)</sup>	P	Female crimp (fig. 2) <sup>1)</sup>
B	Male crimp (fig. 2) <sup>1)</sup>	U	Female crimp (fig. 2) <sup>1)</sup>
G	Male crimp (fig. 2) <sup>1)</sup>	N	Female straight print
M	Female crimp (fig. 1) <sup>1)</sup>		

**Note:** <sup>1)</sup> there are two forms of crimp barrels. Please consult adjacent table for contact selection

## Dimension of crimp barrels

Contact			Ref. contact type		Conductor			
ø A (mm)	ø C (mm)	Form per fig.	Male	Female	AWG		Section (mm <sup>2</sup> )	
					min.	max.	min.	max.
0.5	0.45	1	C	M	32	28	0.035	0.09
					26	22	0.140	0.34
0.7	0.80	1	C	M	32	28	0.035	0.09
	0.45	2	B	P	24	20	0.250	0.50
0.9	1.10	1	C	M	26	22	0.140	0.34
	0.80	2	B	P	32	28	0.035	0.09
	0.45	2	G	U				

## Contacts reference for plugs, free or fixed receptacles

Contact type	Reference		Contact			Conductor			
	Male	Female	ø A (mm)	ø C (mm)	Form per fig.	Stranded			
						AWG		Section (mm <sup>2</sup> )	
min.	max.	min.	max.						
<p style="text-align: center;">Crimp</p>	C	M	0.5	0.45	1	32	28	0.035	0.09
	C	M	0.7	0.80	1	26	22 <sup>1)</sup>	0.140	0.34
	B	P		0.45	2	32	28	0.035	0.09
	C	M	0.9	1.10	1	24	20	0.250	0.50
	B	P		0.80	2	26	22 <sup>1)</sup>	0.140	0.34
	G	U		0.45	2	32	28	0.035	0.09
<p style="text-align: center;">Print</p>	-	N	C dimensions are detailed in the section on PCB drilling pattern. See page 26.						

**Note:** <sup>1)</sup> for a given AWG, the diameter of some stranded conductor designs is larger than the crimp barrel diameter. Make sure that the maximum conductor diameter is smaller than ø C.

## Mixed / Hybrid Overview

Size	Ref	Number of LV Contacts	Diameter	Number of Hybrid Contact and Type	Insert
RR	804	4	0.5mm	1 coax, 50 ohm	
OR	004	4	0.7mm	4 pneumatic/fluidic 5 bars max pressure 3mm tube diameter	
OR	704	4	0.7mm	4 high voltage 2.7 kV rms (test volt) 7.5 kV dc (test volt)	
OR	804	4	0.7mm	4 coax, 50 ohms	
OR	813	13	0.7mm	2 coax, 50 ohm	
1R	703	3	0.9mm	8 high voltage 2.7 kV rms (test volt) 7.5 kV dc (test volt)	
1R	803	3	0.9mm	8 coax, 50 ohm	
1R	855	22 33	0.5mm 0.7mm	1 coax, 50 ohm	

Insert configuration

### Multipole

			713	2	7.5	2.0	13	0.7	●	1.35	3.0
<b>1R</b>			703	8	7.5	2.0	3	0.9	●	1.5	3.5

### Male

**FGG.0R.403.ZLME15**

**HV contact  
Contact HT**

### Female

**EGG.0R.403.ZLCE15**

**HV contact  
Contact HT**

### Typical Assembly of High Voltage Contact

HV Contacts: Fit the HV sleeve onto the cable dielectric, check that all the HV conductor strands pass through the small hole.

Crimp the contact using tool DPC.91.701.V fitted with positioner DCE.91.051.BVCM, set to position 3. Fit by turning the HV sub-assembly on the HV sleeve and push until it butts. The two insulators should be at the same level.

<b>HV Contact</b>	<b>Conductor Range</b>	<b>26-28 AWG</b>
<b>HV Contact</b>	<b>Maximum Dielectric</b>	<b>1.5mm</b>

## Mixed Coax + Low Voltage

		Reference	Coax				Low voltage (LV)					
Male coax contacts	Female coax contacts		Number of contacts	Impedance ( $\Omega$ )	Type	Cable group	Number of contacts	$\phi$ A (mm)	Crimp contact	Test voltage (kV rms) <sup>1)</sup>	Rated current (A) <sup>1)</sup>

			855	1	50	1R	1	22 33	0.5 0.7	● ●	0.6 1.35	0.5 2.0

### Male

**FGG.0R.250.ZLME28**

Coax contact  
Contact coax

### Female

**EGG.0R.250.ZLCE28**

Coax contact  
Contact coax

### Typical Assembly of Coax Contact (Coax Types - RG-174/U, RG-188 A/U, RG-316/U) = Cable Group 1

Coax contacts: Fit the crimp ferrule onto the cable. Crimp the contact using tool DPC.91.701.V fitted with positioner DCE.91.050.RVCM, set to position 3. Fit by turning the coax sub-assembly on the central contact until the stop is reached, check that the central contact is in the correct position in relation to the sub-assembly (0.5 mm), fold back the cable screen, place the crimp ferrule over the crimping area and complete the crimp using tool DPE.99.003.1K.

### Male

### Female

### Typical Performance

#### VSWR / T.O.S.

## Mixed: Fluidic + Low Voltage

		Reference	Fluidic			Low voltage (LV)				
Male fluidic contacts	Female fluidic contacts		Number of contacts	Flow (l/min)	Operating pressure (bars)	Number of contacts	ø A (mm)	Crimp contact	Test voltage (kV rms) <sup>1)</sup>	Rated current (A) <sup>1)</sup>

## Fluidic / Pneumatic Contacts

### Fluidic / pneumatic male contact

### FGG.0R.010.AZ05 Male fluidic / pneumatic contact

Part number

FGG.0R.010.AZ05 (2.7mm hose barb and valve)

**Note:** 3 – Hose fitting/ barb, 2 – retaining clips, 1 – male sleeve

### Fluidic / pneumatic male contact

### FGG.0R.010.AZL05 Male fluidic / pneumatic contact

Part number

FGG.0R.010.AZL05 (1.7mm hose barb and non-valve)

**Note:** 3 – Hose fitting/ barb, 2 – retaining clips, 1 – male sleeve

▶  **Fluidic / Pneumatic Contacts**

**Fluidic / pneumatic female contact**

**EGG.0R.010.AZ05 Female fluidic / pneumatic contact**

Part number  
EGG.0R.010.AZ05 (2.7mm hose barb and valve)

**Note:** 1 – female sleeve, 2 – retaining clips, 3 – Hose fitting/ barb,

**Fluidic / pneumatic female contact**

**EGG.0R.010.AZL05 Female fluidic / pneumatic contact**

Part number  
EGG.0R.010.AZL05 (1.7mm hose barb and non-valve)

**Note:** 1 – female sleeve, 2 – retaining clips, 3 – Hose fitting/ barb,

## Housings

Ref.	Color	RAL code
G	gray	7035
A	blue	6034
S	ochre	1028
V	green	6019

The exact color depends on manufacturing process and material pigments. For this reason some colors may differ from present RAL code.

**Note:** the connector shell material is Crastin® PBT.

# Accessories

## Collets

### FGG Kit for cable clamping

## Tooling

### Manual crimping tools

Supplier	Part number
	contact $\varnothing$ 0.5-0.7-0.9
LEMO	DPC.91.701.V <sup>1)</sup>
DANIELS	MH860 <sup>1)</sup>
ASTRO	616336 <sup>1)</sup>

<sup>1)</sup> According to specification MIL-C-22520/7-01.

### DPE Manual crimping tool for coax contacts

Part number	Cable group
DPE.99.003.1K	1

### DCE Positioners for crimp contacts $\varnothing$ 0.5-0.7 and 0.9 mm

These positioners are suitable for use with both manual and pneumatic crimping tools according to the MIL-C-22520/7-01 standard.

	Connector + Contact					Positioners part number	
	Type	$\varnothing$ A	$\varnothing$ C	$\frac{L}{\varnothing}$	Conductor AWG	For male contact	For female contact

					28-30-32		
					28-30-32		
<b>1R</b>	336	0.7	0.80	1	22-24-26	DCE.91.070.BVC	DCE.91.070.BVM
					28-30-32		
<b>1R</b>	365/367	0.5	0.45	1	28-30-32	DCE.91.050.BVC	DCE.91.051.BVM

**Note:** a wide variation of strand number and diameter combinations are quoted as being AWG, some of which do not have a large enough cross section to guarantee a crimp as per either MIL-C-22520/1-01 or /7-01. Our technical department is at your disposal to study and propose a solution to all your applications.

### DCF Extraction tools for crimp contacts

	Connector		Extractors
	Type	Contact ø A	Part number
<b>RR</b>	313	0.5	DCF.91.050.2LT
	310	0.9	DCF.91.090.2LT
<b>0R</b>	317	0.7	DCF.91.070.2LT
	337	0.5	DCF.91.050.2LT
<b>1R</b>	328	0.9	DCF.91.090.2LT
	336	0.7	DCF.91.070.2LT
	365/367	0.5	DCF.91.050.2LT

**Note:** this model is used for male and female contacts.

## Technical characteristics

### Outer shell

The R series is made of lightweight polyester resin Crastin® PBT from Dupont™ with metal latches.

### Insulator

The insulators are made of PEEK plastic. The insulators of the coax contact and the high voltage contact are Teflon™.

## Electrical contact

### Technical description

The secure reliable electromechanical connection achieved with LEMO female cylindrical contacts is mainly due to two important design features:

1. *Prod proof entry* on the mating side which ensures perfect concentric mating even with carelessly handled connectors.
2. *The pressure spring*, with good elasticity, maintains a constant even force on the male contact when mated. The leading edge of the pressure spring preserves the surface treatment (gold-plated) and prevents undue wear.

### Contact material and treatment

LEMO female contacts are made of bronze beryllium (QQ-C-530) or bronze (UNS C 54400). These materials are chosen because of their high modulus of elasticity, their excellent electrical conductivity and a high mechanical strength.

LEMO male solder and print contacts are made of brass (UNS C 38500). Male crimp contacts are made of brass (UNS C 34500) or annealed brass (UNS C 38500) with optimum hardness (HV) for crimping onto the wire.

Type	Material (standard)	Surf. treatment (µm)		
		Cu	Ni	Au <sup>1)</sup>
Male crimp	Brass (UNS C 34500)	0.5	3	1.0
	Brass (UNS C 38500)			
Male print	Brass (UNS C 38500)			
Female crimp	Bronze (UNS C 54400)	0.5	3	1.5
Female print	Cu-Be (FS QQ-C-530)			
Clips	Cu-Be (FS QQ-C-530)	-	-	-
	Stainless steel			
Wire <sup>2)</sup>	Brass	-	3 <sup>3)</sup>	-

**Notes:** the standard surface treatment are as follows:

- nickel: FS QQ-N-290A or MIL-C-26074C

- gold: ISO 4523.

<sup>1)</sup> minimum value

<sup>2)</sup> for elbow print contacts

<sup>3)</sup> treatment completed by 6 µm Sn-Pb tin-plating

## Crimp contacts

The square form crimp method is used (MIL-C-22520F, class I, type 2) photo 1 for unipole contacts.

For multipole contacts the standard four identer crimp method is used, MIL-C-22520F, class I, type 1), photo 2. The crimp method requires a controlled compression to obtain a symmetrical deformation of the conductor strand and of the contact material. The radial hole in the side of the contact makes it possible to check whether the conductor is correctly positioned within the contact. A good crimping is characterized by only slightly reduced conductor section and practically no gap.

For optimum crimping of bronze or brass contacts they are annealed to relieve internal stress and reduce material hardening during the crimping process. Only the crimping zone is annealed with the help of an induction heating machine designed by the LEMO Research and Development Department (see photo 3).

## Advantages of crimping

- practical, quick contact fixing outside the insulator
- possible use at high temperature
- no risk of heating the insulator during the conductor-contact fixing
- high tensile strength

Crimp contacts are available in standard version (form 1) for mounting maximum size conductors.

For some dimensions, these crimp contacts can be produced with reduced crimp barrels (form 2) for mounting reduced size conductors.

## Crimp contacts

The crimp contacts can be with two forms: a standard crimp barrel for large conductors (see fig. 1) or with a reduced crimp barrel for smaller conductors (see fig. 2).

Fig. 1

The range of cable dimensions that can be crimped into our contacts are indicated on the table on page 9.

Fig. 2
